

## Spain – Information available on 3<sup>rd</sup> February 2022

### Country entry requirements:

Before travel to Spain, everyone (including children under 12 years old, see [Children and young people](#)) travelling by air or sea must fill in and sign an online [Health Control Form](#). If you do not complete this form electronically, you may submit it in paper format before boarding.

On arrival into Spanish ports and airports you must show the QR code (hardcopy or digital) issued when you completed the online [Health Control Form](#) before travel.

The additional documentation you must present on entry when travelling from the UK to Spain is determined by your reason for travel:

- You must show valid proof of being fully vaccinated (with both doses of a two-dose vaccine or one dose of a one-dose vaccine) at least 14 days prior to arrival in Spain (date(s) of vaccination must be specified). See [‘if you’re fully vaccinated’](#). You cannot use the UK [proof of COVID-19 recovery record](#)

You may also be subject to additional checks at the point of entry including a temperature check, visual health assessment, or testing on arrival. Passengers may also be contacted and required to undertake a PCR, TMA or LAMP test at any point up to 48 hours after their arrival in Spain. More information can be found on the Spanish government’s [Border Health Controls webpage](#).

Everyone (excluding children under the age of 12 years old, see [Children and young people](#)) arriving into Spain who have visited a ‘risk country’ in the previous 14 days must meet the requirements on the [Spanish Ministry of Health Travel and COVID-19 page](#). The Spanish government reviews their ‘risk countries’ list every 7 days.

Requirements are country specific. You may get a minimum fine of €3000 if you do not comply with the requirements.

If you are travelling from a country where Spain has travel restrictions, check with the Spanish Embassy in that country before you travel to Spain. Due to current travel restrictions, you may be questioned on arrival by Spanish border authorities to ensure you meet the legal entry requirements. Spanish border authorities only allow entry if they are satisfied that you meet the entry requirements, and reserve the right to deny passage.

All travellers should follow the advice of the local authorities on how best to protect themselves and others, including any measures that they bring in to control the virus. See the [Coronavirus section](#) for further information.

### If you’re fully vaccinated

If you’re fully vaccinated and travelling from the UK, you can enter Spain without needing to test or quarantine regardless of your reason for travel. Your vaccination status must meet the Spanish authorities’ validity period requirements.

- From 1 February onwards, at least 14 days must have passed since being fully vaccinated (with both doses of a 2-dose vaccine or one dose of a single-dose vaccine) before arrival in Spain. Your date(s) of vaccination must be specified and your final dose must have been administered within 270 days prior to travel to Spain. If you completed your vaccination (with both doses of a 2-dose vaccine or one dose of a single-dose vaccine) more than 270 days prior to travel to Spain, you must be able to show proof of having receiving a booster jab.

Only vaccines authorised by the [European Medicines Agency](#) or by the [World Health Organisation](#) are accepted.

Children under the age of 12 years old do not need to show proof of being fully vaccinated on entry to Spain – see [Children and young people](#)

### **Proof of vaccination status**

You must show valid proof of being fully vaccinated to enter Spain from the UK if travelling for tourism purposes. If one of the exemptions listed applies to you, you may be able to present other documentation on entry. See [Exemptions](#)

Spain will accept the UK's proof of [COVID-19 vaccination record](#) and proof of COVID-19 vaccination issued in the Crown Dependencies.

Your date(s) of vaccination must be specified and you need to have had a vaccine authorised by the [European Medicines Agency](#) or by the [World Health Organisation](#).

Your NHS appointment card from vaccination centres is not designed to be used as proof of vaccination and should not be used to demonstrate your vaccine status.

Fully vaccinated children aged 12 to 15 can request an NHS COVID Pass letter for international travel. See [Using your NHS COVID Pass for travel abroad – Children](#).

Documents can be in either English, Spanish, French or German and in paper or electronic format. They must specify your name and surname. See 'Entry requirements for entry in Spain from third countries' section 'k.' on the [Spanish Ministry of Health Travel and COVID-19 page](#) for further information on proof of vaccination for travelling to Spain from the UK.

Further rules may apply if you have travelled to a country on [Spain's list of 'risk' countries](#) in the 14 days prior to travel to Spain.

If you're travelling to Spain for tourism purposes, you cannot use the UK [proof of COVID-19 recovery record](#) certifying that you have recovered from COVID-19 in the last 6 months. See the [Spanish Ministry of Health Travel and COVID-19 page](#) for details.

**If required, we can support guests to present this information at the airport and border control.**

### **If you're not fully vaccinated**

Under the Spanish government's current measures, you can only enter Spain from the UK for tourism purposes if you can show valid proof of meeting the vaccination requirements set out above.

### **If you've had COVID-19 in the past year**

If you're travelling to Spain for tourism purposes, you cannot use the UK [proof of COVID-19 recovery record](#) certifying that you have recovered from COVID-19 in the last 6 months.

### **What to do if you test positive:**

If you are tested and the result is positive, you must self-isolate in your accommodation and call your regional hotline or one of the alternative helpline numbers as set out above. You must remain in your accommodation

until contacted by local Spanish authorities. Contact times may vary across regions and can take up to 48-72 hours.

You may be able to remain in your existing accommodation, or be required to transfer into a state hospital or other government-provided accommodation. You may be required to fund accommodation whilst you wait to be transferred.

The nature of your accommodation may differ from the specifications of your pre-booked hotel, villa or other place of stay.

Depending on local arrangements, travellers in groups may be required to stay in separate accommodation (e.g. if a sufficient number of rooms is not available in one venue, your group may be spread across different accommodation locations).

You should follow the advice of the local authorities at all times.

**In the event of a guest testing positive we will assign one member of the Go beyond team to support the guest through this period. The guest and support team member may need to move to different accommodation if there is not sufficient space to self-isolate in the holiday accommodation. The guest and support team member will have to move to another accommodation when the rental of the accommodation has expired. A rescheduled flight will need to be arranged for the guest and team support member. There will be extra costs incurred in the event of a guest testing positive and we strongly recommend that you acquire sufficient travel insurance to cover this eventuality, or you will be liable for these costs.**

### **Re-entry into England requirements.**

If you **qualify as fully vaccinated** for travel to England, you:

- will not need to take a COVID-19 test before you travel to England or after you arrive
- will not need to quarantine when you arrive
- You will need to [complete a passenger locator form](#) before you travel to England.

**If required we can support guests to complete a passenger locator form at the required time and present this information at the airport and border control.**
